PROPOSED CLAIM AMENDMENT

Examiner Dowling,

Thank you for the Notice of Allowance dated Feb 3, 2006 in the above referenced application. That Notice made Examiner Amendments to claims 43 and 53 to provide antecedent basis for the term "light source chip". We prefer to remove the single instance of the term "chip" from line 5 of claim 53 rather than to add the Examiner's term "having a light source chip" at line 2 of that claim. Our proposed claim 53 would then read as follows:

53.(Currently Amended) A data projector comprising:

- a light source having a light source chip;
- a micro display; and
- a beam forming component comprising a transparent material adjacent to the light source that has an index of refraction matched to that of the light source-chip, said beam forming component defining micro optical structures at least along a surface that is not perpendicular to a line between the light source and the micro-display.

Allowed claim 56 similarly recites a light source absent the term "chip". Please call or email to discuss whether this is acceptable, and if so, how you prefer we enter the above amendment.

Sincerely.

Jerry Stanton
